WORK EXPERIENCE:

The Al-Aajaz Group for General Contracting and General Trade was established in 1982. The company now has two offices one in Baghdad, Iraq and the other in Amman, Jordan.

Since 1982 the Al-Aajaz has performed successfully and maintained a professional reputation for excellence in both procurement and construction contracting.

Since the war Al-Aajaz has performed both procurement contracts and construction contracts for United States Government.

These projects range from trash collection, building a CMU perimeter wall, provide generators and install electrical generation units to erecting sprung tents with concrete floors and partition walls.

During the past three (3) years the company has also performed in Amman for private enterprises in the building construction of a restaurant and four (4) thirty (30) unit multistory apartment buildings.

The Al-Aajaz Group for General Contracting and General Trade has built facilities that include all the Architectural design, Structural Engineering, Civil Engineering Electrical and Mechanical Engineering. Our experience includes several types of specialized work force from Electrical installation, A/C installation, Installation of doors and windows, specialized concrete and reinforcing steel placement. Our experience also includes working with specialized sub-contractors and coordinating with Governmental entities.

4 March 2005

MEMORANDUM FOR Mr. Jamison, Kellogg, Brown and Root Inc.

SUBJECT: Letter of recommendation for Mr. Khair Al-Deen

1. I would like to highly recommend Mr. Khair Al-Deen's group of companies for providing construction and life support services in the International Zone, Baghdad, Iraq.
2. Mr. Al-Deen's company completed over \$5 Million in construction for my unit in Balad and has provided services in the Baghdad Area as well. The company has affiliations with several others, and you can depend on them to get the job done. In Balad, his personal involvement, exceptional flexibility, and superior management skills ensured that jobs were completed much faster than any other company could do there. He did this in a non-permissive security environment from March 2004 to August 2004. He was able to deliver materials and equipment when all other companies could not. He ensured that his workers were taken care of and adhered to the security standards at the worksite – again, with unsurpassed personal involvement.
3. In my experience (that includes over \$70 Million in construction and service contracting), Mr. Al-Deen demonstrates a completely unique mission-focus. When challenges come up, he personally intervenes until the problem is solved, and he remains steadfast with solid planning to prevent other problems.
4. I truly believe that no challenge is too great for Mr. Al-Deen to overcome. He is a pleasure to work with and deserves the loyalty of his companies, employees, and customers. I highly recommend his services.
5. Feel free to contact me at scott.petersen@us.army.mil.

PAST PERFORMANCE:

The Al-Aajaz Group currently has no projects where the US Government has terminated the contract.

Projects 1-13 in the WORK EXPERIENCE section of this technical proposal we performed under the supervision of Contracting Officers of the Department of the Army. We have performed all projects on time, under budget, with a stellar quality and safety record. We have inserted a couple of pictures of our pavement projects for review.

Projects 14-17 were performed outside the jurisdiction of the US Government and meet or exceed the expectation of the customer.

Below are some pictures of the buildings that Al-Aajaz has built in the past three years in Jordan.
